

Balance of payments – France • June and second quarter 2022

The current account balance deteriorated in the second quarter

In the second quarter of 2022, the current account deficit stood at 8.6 billion euros (seasonally and working-day adjusted data), a deterioration of 7.5 billion compared to the first quarter (-1.1 billion). The goods deficit widened to 32.4 billion euros (after 23.7 billion in Q1). The energy bill reached 25.4 billion euros (20.5 billion in Q1). The services surplus increased to 18.3 billion euros, after 15.3 billion in Q1.

In June 2022, the current account balance stood at -1.6 billion euros (seasonally and working-day adjusted data), an improvement of 2.1 billion compared to May.

In the second quarter, the financial account recorded net capital inflows of 7 billion euros (non-seasonally adjusted). Net inflows in the form of loans and borrowings (59.7 billion in the second quarter) were offset by net portfolio investment outflows (50.8 billion).

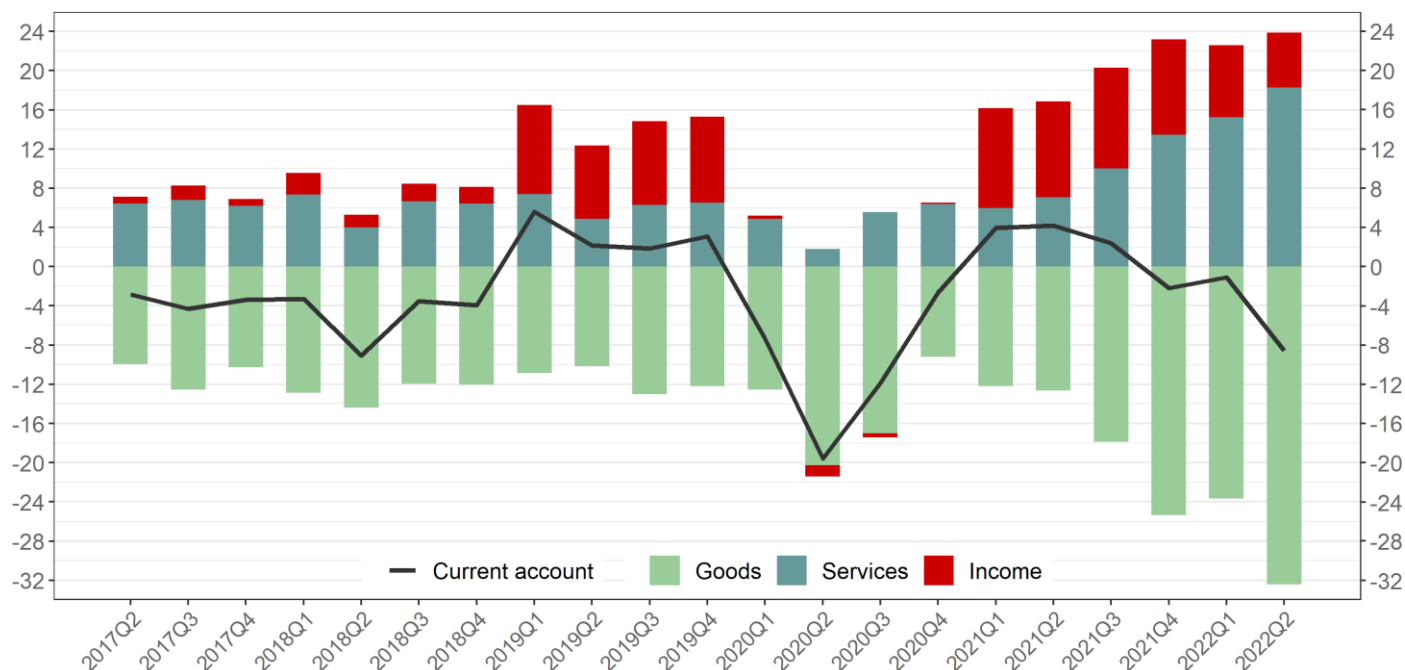

France's balance of payments

Current account balance and its components (Billion euros, seasonally and working-day adjusted data)

Methodological notes relating to page 1

(1) Data on trade in goods are FOB-FOB values, which means without cost, insurance and freight. The latter expenditure is recorded in the services item. Exchanges of goods include general merchandise as published by the Directorate General of Customs and Excise (DGDDI) on one side, merchandising and methodological adjustments calculated by the Banque de France, on the other side. It ensures the comparability of French balance of payments with those of other countries and its conformity with the international standards set by International Monetary Fund. The key underlying concept in balance of payments is the economic ownership (as for the national accounts).

(2) Services other than travel (tourism and professional travels), transport services, professional and management consulting services, R&D and development and technical services, trade-related and other business services include manufacturing, maintenance and repair, construction, insurance and pension services, financial services, charges for the use of intellectual property, telecommunication, computer and information services, personal, cultural and recreational services and government goods and services.

(3) Income includes primary and secondary incomes. Primary income refers to the flows received by economic agents for their participation in the production process ("compensation of employees") or for the provision of financial assets ("investment income") or for the rental of natural resources ("rent"). Taxes and subsidies on products and production are also included in primary income. Secondary income records current transfers between residents and non-residents. A transfer is a transaction that involves the provision of a good, service, financial asset or another non-produced asset without receiving something of economic value in exchange.

(4) The "other investment" (loans and deposits) component of the financial account includes all transactions in financial assets and liabilities with non-residents that do not concern direct investment, portfolio investment, financial derivatives or reserve assets. In practice, this mainly concerns bank deposits and interbank lending, as well as loans and deposits made by insurance companies and all kinds of investment companies and funds.
