

September 4th 2023

Loans to individuals – France • July 2023

Housing loan production stands at €10.1bn in July

- Seasonally adjusted production of housing loans excluding renegotiations stands at €10.1 bn in July (after €11.1 bn in June). The annual growth rate of outstanding home loans continues to slow (+2.7% in July 2023, after +3.3% in June). However, this growth remains significantly higher than that of all our European neighbours, and more than three times higher than the eurozone average.
- The average interest rate on housing loans, excluding fees and insurance, stands at 3.43% in July for new loans excluding renegotiations, up 18 basis points on the previous month but still less than the average rates charged in other major euro zone countries.
- The annual growth rate of outstanding consumer loans is virtually stable at +2.7% in July (after +2.8% in June).

of which housing loans excluding renegotiations	2.72	2.92	3.08	3.25	3.43	3.63
- loans for consumption purposes (b)	5.45	5.64	5.79	5.85	5.91	
- overdrafts for individuals (d)	5.82	6.09	6.10	6.14	6.20	

(a) Parameters for seasonal adjustment are updated each month, taking into account monthly data under review.

(b) Excluding revolving loans. Loans for splitted-cost payments (mainly "loans granted on market place" and "extended credit-card credits" are included into consumption loans.

(c) Ratio of renegotiated loans on housing loans, both not seasonally adjusted

(d) Overdrafts: negative balance of ordinary accounts + commercial credits + factoring + cash credits without fixed repayment schedule (including mobilization of revolving loans).

(e) Revised data

(f) Provisional data

(g) Nowcasting

Renegotiated loans are loans where at least one of the terms of the initial contract is modified with the active participation of the borrower, giving rise to the declaration of a new contract. They include in particular loans for which the insurance contract has been modified (since February 2022 the Lemoine law authorizes the termination at any time of the borrower's insurance contracts, without any notice period or fees or penalties) even if the other characteristics of the loan remain unchanged.

Interest rates on housing loans, all maturities

(Narrowly defined effective rate, average weighted by long and short term flows, in %)

Production of new housing loans

Euro area : Annual growth rate of outstanding housing loans to households(1) (in %)

Euro area : Interest rates for new housing loans (overall effective rate including fees and insurance, in %)

(1) Households = Individuals + sole entrepreneurs + non-profit institutions serving households. The annual growth rate of outstanding housing loans to households in France is +2.9% in July 2023 and +2.7% for individuals alone

Euro area: New housing loans (excluding renegotiations) to households, cumulative in €bn

Quarterly additional information on credit for consumption

Changes in outstanding consumer credit to individuals

	Outstanding amounts in EUR Billions					Annual growth in %	
	Jun-22	Sep-22	Dec-22	Mar-23	Jun-23	Mar-23	Jun-23
Credit for consumption to individuals	198.0	200.0	202.8	202.2	203.7	3.9	2.8
Overdrafts	10.3	10.2	10.0	9.5	9.0	-2.1	-12.7
Revolving loans	18.8	19.2	19.5	19.7	20.6	5.9	9.4
Leases	17.5	17.9	18.6	19,0	19.9	10.4	13.6
Personal loans	93.5	93.9	94.7	95.7	96.3	7.5	2,4
Credits at the point of sale (of which buy now pay later loans)	19.0	19.2	19.6	19.8	20.5	-2.5	7,8
Other treasury loans	13.9	14.1	14.6	13.0	13.0	-7.8	-6.5
Securitised loans	25.0	25.6	25.8	25.4	24.4	-2.7	-2.5

Note: **Revolving credit** (formerly called revolving credit) is a form of credit that consists of making available to a borrower a sum of money that can be reused as it is repaid to finance non-predefined purchases.

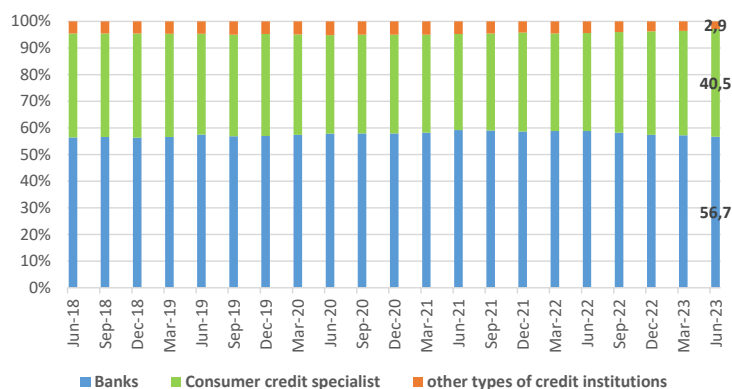

Within consumer credit, revolving loans (+9.4% in June 2023, year-on-year), leasing (+13.6% in June 2023) and credits at the point-of-sale (+7.8% in June 2023) are the most dynamic components.

On the other hand, outstanding overdrafts falls sharply (-12.7% in June 2023, year-on-year) and growth in personal loans, which account for almost half of outstanding consumer credit, slows sharply (+2.4% in June, after +7.5% in March).

Interest rate (narrowly defined) on new revolving loans by type of credit institution, %

Distribution channels of revolving loans, in % of the total outstanding amount of revolving credits

Additional information

Only loans granted to individuals (households excluding sole proprietors and unincorporated partnerships) by resident monetary financial institutions are presented here. The outstanding growth rates are calculated from monthly changes in stocks (including sales and securitization) by correcting from modifications that do not reflect economic changes, especially, the accounting derecognition of loans from the MFI's statistical balance sheet due to write-offs/write-downs. Conversely, exchange rate effects are taken into account without any change for technical reasons. Monthly growth rates are those of new loans agreed, i.e. disbursed. Nevertheless, new loan production represents new loans granted, even when they are not actually disbursed to the borrower, in accordance with the Eurosystem harmonised methodology, which aims to provide the public with an indicator that rapidly reflects changes in loan production. For this reason, the production of new loans differs from monthly changes in outstanding loans. Indeed, on the one hand, outstanding loans are recorded after the effective disbursement of funds and, on the other hand, they are reduced by the amortization of old loans. The weighted average rates and new business volumes are calculated according to the harmonized definitions of the Eurosystem. Published rates are the narrowly defined effective rate (NDER). They correspond to the interest component of the Annual Percentage Rate of Charge (APRC). Renegotiated loans also include external mortgage repurchases.

Low-income households are defined as those with an annual net income before tax of less than or equal to €30,000.

As of October 1st, 2021, the Banque de France start offering a nowcasting on new business loans and interest rates based on a model which takes into account market conditions (reference interest rate, property transfer duties...) and the past values of the estimated variables. The absolute nowcasting deviation is on average 0.3 billion euros over the long term, i.e. 1.5% of the average gross flow. For interest rates, the absolute deviation is 1 basis point on average.

For the European comparison, the scope of borrowers is extended to households, which includes, in addition to individuals, sole entrepreneurs and non-profit institutions serving households.
