

27th June 2024

Money and the financing of the economy – France • May 2024

- In May 2024, the collection of overnight deposits is positive for the 2nd consecutive month (+€5.1 billion, after +€3.4 billion in April; SA flow) and that of interest-bearing deposits (M2-M1) continues to increase (+€3.6 billion, after +€5.3 billion in April).
- The growth rate of domestic resources of monetary financial institutions (MFIs) included in M3 is stable compared to the previous month (+1.6% year-on-year in May and April; see Table 2). After taking into account gross monetary liabilities and assets vis-à-vis the rest of the euro area, the annual growth rate of the French component of the euro area M3 monetary aggregate decreases to +2.3% (after +3.2% in April).
- Private sector financing continues to increase in May (+1.2% year-on-year, after +1.5% in April; see table 3) driven by credits to non-financial corporations (+1.8%, after +1.4% in April) while credits to households are stable over one year (+0.1% in May after +0.4% in April).

Table 1 - France: M3 and the financing of the economy

may 2024			
Total assets	238.3	Total liabilities	238.3
Domestic General Government financing	7.2	Resources included in M3	47.3
of which loans	-2.9	M1	-
of which securities	10.1	M2 - M1	101.4
Domestic private sector financing	43.0	M3 - M2	48.6
of which loans to households	2.1	Long-term resources (a)	191.0
of which loans to NFC	23.7		
Net external assets	105.3		
Remaining counterparts (b)	82.8		

(a) Deposits over 2 years, debt securities issued, capital and reserves, central government deposits.

(b) Net of inter-MFI assets and liabilities, net of other balance sheet items (financial derivatives, accounting lags, fixed assets), currency in circulation, gold, SDR.

Additional information

Resources included in M3 (excluding banknotes and coins) consist of investments with a maturity of up to two years held by money-holding agents (households, non-financial corporations, General government excluding central government, insurance companies, pension funds, non-monetary mutual funds, investment firms and special purpose vehicles, for the most part) with monetary financial institutions (MFI).

Monetary financial institutions (MFIs) include credit institutions, finance companies, the *Caisse des dépôts et consignations*, money market funds and the *Banque de France*.

Saving accounts include *Livret A* and *Livret Bleu* passbooks, sustainable development and solidarity passbooks, home savings accounts, popular savings passbooks, youth passbooks and ordinary passbooks. Regulated savings are partly centralized in the Savings Fund managed by the *Caisse des Dépôts et Consignations* and thus only pass through the banks' balance sheets. Repurchase agreements are temporary purchases of securities by customers (particularly companies, insurance companies and non-money market funds). Debt securities with a maximum maturity of two years mainly comprise Negotiable European Commercial Paper (NEUCP) issued by French banks and subscribed by customers that are not credit institutions or money market funds.

Funding of the economy includes all financing provided by MFIs to the domestic public and private sectors, in the form of loans and securities (debt and equity). For **loans to households and nonfinancial companies (NFCs)**, loans transferred (securitisations) with impact on banks' balance sheets are reintegrated.

Net external assets correspond to the balance (assets minus liabilities) of MFI operations with the rest of the world.

Long-term inflows of MFIs include capital and reserves, debt securities issued by MFIs with a maturity of more than 2 years, deposits with a maturity of more than 2 years and central government deposits.

The item "**Remaining counterparts**" includes the balance of inter-MFI receivables and liabilities, the net of other balance sheet items (financial derivatives, accounting differences, fixed assets) and currency in circulation.

Growth rates for the outstanding amounts are calculated by adjusting changes in stocks for effects not resulting from economic transactions, in particular corrections for classification errors, but not for exchange rate effects.

The data on outstanding amounts, annual growth rates, and 12-month cumulative flows published in this Statinfo are not seasonally adjusted, but the monthly flow data are.
